

EUROBLOCK BOX

Improves energy efficiency in any restoration or renovation project.

The excellent thermal and acoustic properties contribute to energy and cost savings.

Different combinations in PVC and in aluminium, in levelness and normal versions.

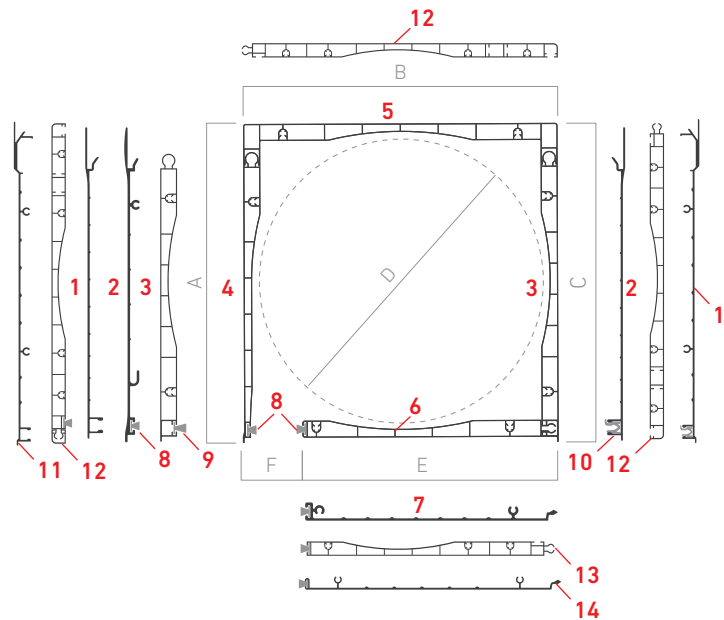

Levelness design in any installation, compatible with aluminium and PVC joinery.

For use with aluminium joinery, the profiles enable finishes in any RAL lacquer, anodised and grained wood, presenting a uniformity of finish between the box, blind and joinery.

PVC compact system.

Euroblock box levelness assembly, 2 PVC and 2 Aluminium.

EURODECOR BOX

Improves energy efficiency in any restoration or renovation project.

The excellent thermal and acoustic properties contribute to energy and cost savings.

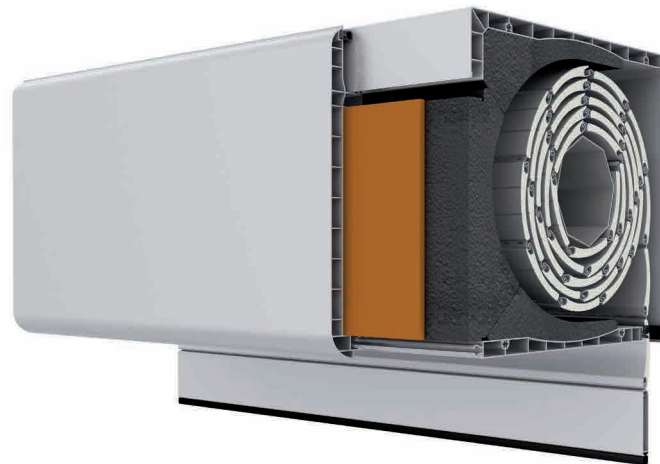

Special insulating material, available for sizes 155 and 185 mm (keeping the same winding capacity).

New insulating material Grafipol and Passive which favors the decreasing of the acoustic and thermal level inside the stay.

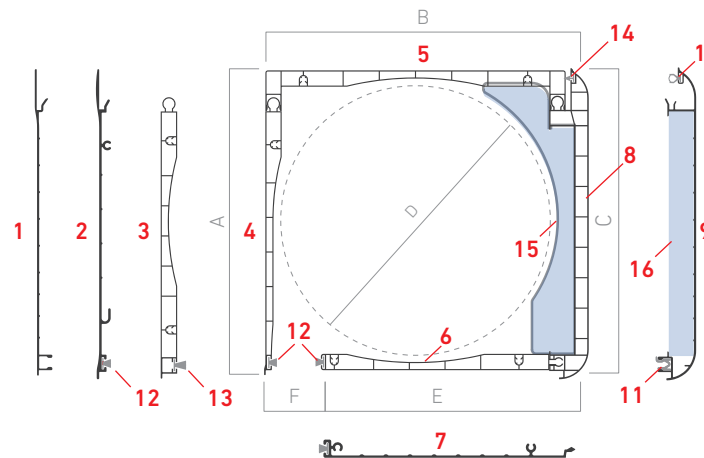

Levelness design in any installation, compatible with aluminium and PVC joinery.

For use with aluminium joinery, the profiles enable finishes in any RAL lacquer, anodised and grained wood, presenting a uniformity of finish between the box, blind and joinery.

PVC compact system.

Assembly Eurodecor box without levelling, 4 PVC profiles with passive insulating.
